Critical Care
Emergency Medical
Transport Provider

The Critical Care Transport Program was designed by the University of Maryland, Baltimore County to prepare paramedics and nurses to function as members of a critical care transport team. Critical patients that must transported between facilities require a different level of care from hospital or emergency field patients.

The Critical Care Transport Program brings paramedics and nurses together in an effort to bridge the gap between prehospital and hospital care. The result is a specialized care provider that has an understanding of both aspects of patient care, and uses the understanding to provide the highest level of care to critical patients during transport.

TEXTBOOK:
Primary readings are recommended to prepare participants for the course and to enhance the learning experience. The recommended textbook is Critical Care Transport AAOS, UMBC, ACEP available from Jones and Bartlett, 2018

Note: Cost of textbook is not included with tuition.
